

Practical Metalworking

On your choice sheet as Engineering Craft Skills

The course will allow you to develop manual skills through the use of a wide range of tools, machines and materials. Also you will develop safe working practices and knowledge of sustainability issues. So if you have enjoyed working in the workshop and would like to learn more about manufacturing with metal in a completely practical course producing models then this is the course for you.

Note – Although the majority of the course is workshop based there are elements that will be completed within the classroom

Course is split into 4 Sections

Unit 1 – Bench Skills

Unit 2 – Machine Processes

Unit 3 – Fabrication and Thermal Joining

Added Value Unit or Assessment

Practical Metalworking has 2 levels National 4 & National 5

All units are covered in the production of a BBQ
