

Practical Woodworking

The course will allow you to develop manual skills through the use of a wide range of tools, machines and materials. Also you will develop safe working practices and knowledge of sustainability issues. So if you have enjoyed working in the workshop and would like to learn more about manufacturing with wood in a completely practical course producing models then this is the course for you.

Note – Although the majority of the course is workshop based there are elements that will be completed within the classroom

Course is split into 4 Sections

Unit 1 – Carcase Construction

Unit 2 – Flat Frame Construction

Unit 3 – Machining & Finishing

Added Value Unit or Assessment

Practical Woodworking has 2 levels National 4 & National 5

Examples of Work include

Lidded Box

Toolbox

Blackboard with Easel

There are completed models for you to look at including the final project
